

Appendix F. Visual Proof of Data-driven Hybrid Reranking (GraphAD+)

(a) Raw Anomaly Scores:
Data-driven Ambiguity

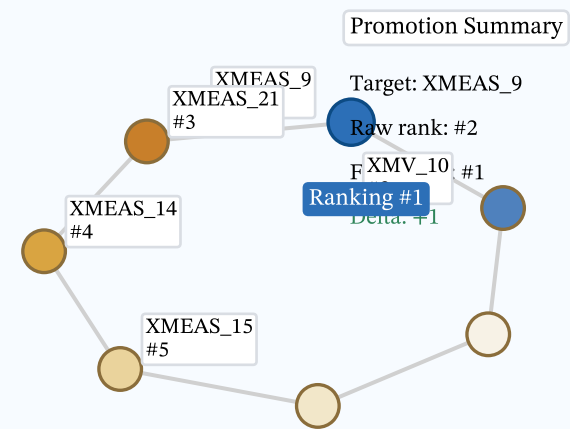

At sample 344, raw evidence spreads across multiple correlated sensors.

(b) Graph Smoothing:
Correlation-aware Propagation

GraphAD+ propagates evidence through the learned correlation topology.

(c) Final Reranking:
Root-cause Identification

Rank palette: 1 2 3 4 5

The reranked top candidate becomes XMEAS_9 after structure-aware smoothing.
